

Catherine Lockwood

I urge ADEQ to grant the Aquifer Protection Permit for the Copper World project. This project is strategically important for our state, promising to enhance Arizona's local economy and contribute to our national resource independence. It is my observation that our countries permitting and licensing is some of the toughest in the world. Our country holds our environment to the highest standards. I believe ADEQ's oversight will ensure the project meets the highest environmental standards.

Sincerely,

Catherine Lockwood
