

Jeneva Ritchey

I am delighted to express my wholehearted support for the Copper World Project and advocate for ADEQ's issuance of an Aquifer Protection Permit to facilitate the construction of this new mine. Recently, I discovered that Arizona's mining industry is currently more productive than ever in its extensive history. The forthcoming Copper World Project is poised to play a crucial role in boosting our state's copper production, concurrently creating well-paying jobs for local families.

In favor of bolstering our domestic copper production and reducing reliance on foreign sources for essential minerals, I enthusiastically vote Yes for the Copper World Project. I implore you to prioritize Arizona's interests and do the right thing by approving Copper World's application for an Aquifer Protection Permit.

Sincerely,

Jeneva Ritchey
