

Alberto Bennett

I am writing to express my endorsement for the Copper World project. My support is based on the comprehensive environmental measures that have been proposed, which I believe will safeguard our precious natural resources. ADEQ's role in ensuring these measures are upheld is crucial, and I trust their expertise in this matter.

Copper is a critical mineral the United States and the Copper World Project can be the next local Arizona source of copper for the US!

Sincerely,

Alberto Bennett
