

Sarah Carranza

I object to this Class 2 Air Pollution Permit being issued as written due to inadequate meteorological monitoring around the most affected populated areas. Hudbay has three planned storage areas, only two are in the permit. The third will be added as an amendment. With the addition of the third area, Hudbay will likely trigger the requirements for a Class 1 Permit. Since Hudbay is not providing enough information about its long term plans, it would be wise to anticipate that and issue a Class 1 Permit now! The lives of the people living in close proximity depend on it. There is a school very close by and thousands of people who live near by. This will have lasting negative effects on the community.
