

## Suzanne Anderson

I am a resident of Corona de Tucson, one of the closest communities to the proposed Copper World mine, and I have worked in the mining industry since 2014. Currently, I am employed at a mineral resource-related school at the University of Arizona, where future mine employees learn advanced and modern methods for operating mines responsibly and sustainably. Through my experience and professional connections, I know individuals at Hudbay who are committed to following and exceeding environmental regulations. Given my background and understanding of the industry's advancements, I am not concerned about the air quality impacts for myself, my husband, or our four children. From my review of the air permit application, it is clear that Hudbay is in full compliance with the law. I fully support Hudbay's Copper World project and its potential benefits to our community and the mining industry.
