

## Eric Dhruv

Thank you for reading this message. I speak as an American, a long time resident of Southern Arizona, and an educator working with youth and the environment. I urge you to reject the proposed air-pollution permit for the Canadian Copper World mine. As you know, the proposed permit does little to ensure the mine protects our air or environment. At a minimum you must require the Canadian Copper World mine to obtain a Class I permit. A Class I permit is necessary so that the mine is *\*always\** accountable for limiting its air pollution and protecting the environment — no exceptions. This is our land to steward and we must not roll over for a company that does not care one copper cent for this land, culture or even its economy. We are not fools.
