

## Mitch Shade

We look to the agencies that set policies and standards to protect, preserve, and provide for the welfare of its citizens and general population. It's for this purpose that we trust in the idea of "doing what's right" will prevail over "doing what makes the most money". I very strongly urge you to reject the air pollution permit for Copper World, whereas the mere title of this proposed permit suggests "air pollution", and thus health risks to humans, as well as wildlife...not just in our backyard.
