

Andrea Hoerr

I urge you to reject the proposed air-pollution permit for the Copper World mine. As it's currently drafted, the proposed permit does little to ensure the mine protects our air or environment. At a minimum you must require the Copper World mine to obtain a Class I permit. A Class I permit is necessary so that the mine is **always** accountable for limiting its air pollution and protecting the environment — no exceptions.

Further, the expectation that the tailings piles will be 'watered' to keep dust down is not feasible. This will impact our water table and is subject to technical malfunctions.

Respectfully, Andrea Hoerr
