

Emily Ravits

I am a resident of Tucson Arizona and am deeply opposed to the Copper World mine in the Santa Ritas . I appreciate that I have this opportunity to have my opinion valued. This mine will have long reaching impacts on air and water quality. It will wreck the natural geography and it can never be repaired!!

This will affect the natural beauty and the ability to enjoy this region. The disruption from the Copper World mine will destroy the wildlife and native plants! Please do not put in mine,
