

C. Schmidt

Please consider the people in our community. We already have so much dust and pollutants here. Our pets are both prone to asthma now. We moved here because the eastern mountains were so beautiful. That is what makes a community happy, not destroying the beauty of it. And the sulfur plant will not be good, the winds blow all directions and i dont trust it being monitored 24/7...nor all the extra trucks or rail cars on our roads. Thank you for your help in keeping our home beautiful.
