

Jennifer Callaway

I live at the very foot of the Santa Ritas, and I'm extremely concerned, as are all my neighbors, about the impact that this mine will have on our air and water quality. Because of the high winds we experience at this elevation, we already deal with a lot of dust. This project will make our quality of life suffer enormously. And the lax accountability and low standards for monitoring what kind of impact the mine is having is ridiculous. We should not be subjected on our own property to such an invasion of our living conditions. Please stop this from happening.
