

Jonathan Lutz

I am a bicycle commuter, hiker, and birder, which means I enjoy a significant outdoors in southern Arizona. The Santa Rita Mountains are one of my go-to destinations for outdoor recreation. I believe the Arizona Department of Environmental Quality (ADEQ) should require a Class I permit for Hubday, with stricter regulations that would help protect people and the environment from air pollution. Impaired air quality diminishes everyday life for me and members of my community, and I believe businesses in southern Arizona, including Hubday, should be held accountable to the highest possible standards to protect our air. Thank you.
