

Aileen Sluka

I didn't work my whole life to see my dream home ruined by Copper world in many ways!
Forestry, precious Az. water issues, majestic views & air pollution. Your facilities emit the following air contaminants: (PM10), (PM25), (VOCs), (NOx), (SO2), (CO), (H2SO4) & (HAPs) I have concerns for our future: children, Az. water & air contamination, precious wildlife, damaging due to mining: roads, traffic, majestic views including Madara birding. We already have enough Copper mining in Arizona ruining Arizona!
