

David Wickliff

I will make this short, sweet and simple. Copper World's Air Quality Permit must be denied! When returning from Green Valley to South of Corona de Tucson over the last several weeks, the amount of destruction on the West side of the Santa Rita's is appalling. The dust is quite visible. So much for microscopic! The erratic winds speak for themselves. Copper World doesn't give a rats ass about our community or the environment. They are a Global National and that means, money and profits (think shareholders)! They must be stopped before we loose our environment and world.
