

Maggy Zanger

I urge you to reject the proposed air-pollution permit for the Copper World mine. The proposed permit does little to ensure the mine protects our air or environment. You must require the Copper World mine to obtain a Class I permit. A Class I permit is necessary so that the mine is **always** accountable for limiting its air pollution and protecting the environment — no exceptions. This project should be stopped altogether. Especially because of the water use, but the air is also a serious concern to the citizens in the area and we should not allow this profit making company to pollute our homes.
