

L Renee Daniel

To Whom it May Concern:

I suffer from asthma. We have lived in Green Valley for 9 years and moved here from Oregon to because of the beauty of the Santa Rita Mountains, and the treasured ecosystem of the Sonoran Desert. The environmental degradation that we are already experiencing due to the Copper World mine is already having an impact on my health.

Air and Water Quality are factors that cannot be underestimated.

I implore you to deny the permits as presented and take a scientific approach to evaluating the impact of this mine.
