

## Cindy Tapia

The hydrogen chloride impact model that was given left out any residential impact of the area in Benson known as the "Heights", the big mountain of residences between the proposed future ADI facility and the school. Who created the map, where did the data come from, why was the "Heights" left out, and what would the impact be to those residents?

## Hydrogen Chloride Impacts – Long Term Exposure

### Hydrogen Chloride<sup>1</sup> Thresholds

ADEQ Chronic Ambient Air Concentrations	0.02
EPA Health Guideline	0.02

<sup>1</sup> milligrams per cubic meter
