

## Tara Davis

The location of this facility is too close to schools, nursing homes, residences, the San Pedro River and a protected Riparian area. The parent company (Steel Dynamics) has too many violations to disregard the likelihood of an accident or a negligent disregard of the Clean Air Act. In every element of wrongdoing, someone is held accountable. A bad driver has a license suspended, if someone harms a child, they cannot live near children, if a company has had significant Title V violations, said company should not be granted the opportunity to decimate a small town's health and wellness; Please hold Steel Dynamics' Aluminum Dynamics accountable for past actions and do not grant a permit at this location. Protect our city, our people, our land, our air and our water; if not ADEQ, then who?

Thank you.
