

Jacob Wycoff

I have grown up here and planned on living out my life here. I love this area and love the wildlife, the river, the animals, the non polluted water! We test our wells routinely and they are safe to consume. The gardens I grow. The livestock I raise. I will be devastated and have to consider raising a family elsewhere if this potentially toxic plant is built so close to my "forever" home. I know many others my age will feel the same. Please keep this in mind when you make your decisions. This is the last free flowing river in the state of Arizona. Don't risk it for something that could have a location that would be better suited elsewhere!
