

DANIEL SPRENKLE

1. ADI will build a casting pit that will be 90 feet deep. The water table begins at 70 feet. Anything built by man can fail and our water is at risk. DO NOT APPROVE THE PERMIT.

2. The permit request does not require ALL air quality monitoring data to be reported to ADEQ. ADEQ is the public access point to industry emissions data and unless ALL air quality data is reported to ADEQ, the public cannot monitor and protect their health.
