

Roxanne sproul

We moved here a year ago because we live the clean air and water, if we had know ADI was coming we wouldn't have bought here, I have asthma and this will exacerbate the situation and we live 3 block from this is supposed to built, I don't want them polluting our water and air in increasing traffic in area, we love our little town the way it is, why can't this be built 30 miles up or down the highway where no people live, please don't let this happen
