

## Lesley Tower

I am opposed to the ADI building a plant in Benson AZ. I am very concerned about the water usage that is required for a business of this type. I am very concerned about the air particulates that will absolutely invade our town. I am very concerned about the pollution of the precious little water that we have! I am also concerned about the devaluation of our homes and the ultimate increase in taxes. Benson will suffer because of this business. I am opposed to this business ruining our town!
