

Kristal Grimm

Please do not allow for the building of the Aluminum plant in our historic town. This is known to cause damage to both the environment, wildlife, and the people living here by releasing forever chemicals into the land and air.

The excerpt from the News For Tucson article titled "Comment period ends soon for proposed Aluminum Dynamics processing plant in Benson" by Marissa Orr on Aug 19, 2025 says best what this plant will do to our historic town of Benson. "According to the Aluminum Dynamics permit application to ADEQ, over 40 tons of particulate, a mix of solid particles and liquid droplets, will be emitted into local air from the proposed aluminum processing plant. Officials said the proposed plant will also release hazardous air pollutants (HAPs) from four 100-foot emission towers on the site. "

I question how this would even be legal for an environmental agency to bring known harm to residents, wildlife air, land and water into the city of Benson.
Please do not allow for the Aluminum plant to go forward or come to the town of Benson, AZ.
