

Jill Clements

Hello, I believe it is common sense to not allow a permit of this kind, for ADI, that states in its application, it will emit 40 tons of pollutants and HAZARDOUS materials into the air in a residential area as well as a riparian area. I understand the area is zoned for heavy industrial and should've been changed prior to ADI's permit application but that doesn't change the fact that AZDEQ's purpose is protecting air quality. 40 tons of HAZARDOUS pollutants does not equal quality air. I am asking that you please find a legal way out of granting this. So many reasons why it shouldn't be located here. Thank you. Jill Clements
