

Elizabeth Harrah

The facility will emit the following air contaminants:

- Coarse particulate matter (PM₁₀)
- Fine particulate matter (PM_{2.5})
- Volatile organic compounds (VOCs)
- Nitrogen oxides (NO_x)
- Sulfur dioxide (SO₂)
- Carbon monoxide (CO)
- Hazardous air pollutants (HAPs)

The location is only about 7-10 mins from where I live, I feel that Benson and the location is not appropriate it is too close to schools, residents and will have the potential of a health hazard, will not be something that will bring in tourist but drive them away. Please don't allow this plant in Benson.
