

## Dawn Davis

Should Aluminum Dynamics be allowed to build here in the Benson area in the heart of the San Pedro Basin our small community will cease to exist. There will no longer be enough water to support our small community of approximately 5,000 people. Additionally, the San Pedro Basin is a nationally protected riparian habitat. We are also the gateway to Southeastern Arizona with entry to the Cochise Stronghold, Tombstone, Douglas and Bisbee. This would not just destroy Benson, but it would also destabilize the tourist industry to those locations, essentially ruining them as well. No jobs would be worth the destruction to the area.
