

Stephanie Lanin

I am a mother of a 4 year old who constantly gets attacked by mosquitoes and the reactions on her skin turn into welts I am hoping there is help for the invasion of these mosquitoes that can carry diseases. So anything that would help protect my daughter would be greatly appreciated. I've never experienced anything like this before with myself it's unbearable and I've bought every kind of repellent there is. I wish there was help for this problem I hope the DPRs strategic goals and plan include mosquitoes control in Fresno ca because this town needs it we're invested with them. The ponds of standing water don't help neither I'm included photos of the bites my daughter gets here.
