EXTERNAL:

Director Julie Henderson,

Dear DPR Director Julie Henderson,

We strongly support the effort to provide Californians with advance notice of hazardous pesticide use. We urge you to make sure the new regulation is as effective as possible to ensure that impacted residents can protect themselves from harm. To truly be effective, the system must include the exact location of planned pesticide applications.

Scientific research confirms that the public is in greater risk of harm the closer they are to a pesticide application. An application next to one's house is of even greater concern than an application a mile away and would require more precautions.

The rural communities are affected disproportionately, and you heard one testimony from Madera from Rosalva of the Madera County. Please do your job, the office you work for was created to protect human health .

Sincerely,

Rocio Madrigal

Scientific research confirms that the public is in greater risk of harm the closer they are to a pesticide application. An application next to one's house is of even greater concern than an application a mile away and would require more precautions.

As a person that had suffered from unknown pesticide exposures, I insist on the proper and judicious dissemination of pesticide use anywhere it is undertaken.

Sincerely,

Ralph Sanchez

AS A RETIRED MEDICAL PROFESSIONAL, PHYSICIANS FOR WHOM I WORKED IN THE 60'S AND 70'S SUSPECTED INCREASED BLOOD CANCERS AND OTHER CONDITIONS WERE AT LEAST IN PART DUE TO INCREASING CHEMICALS/TOXINS - WE ALL KNOW OUR POLLINATORS AND LIKELY SOME EMBRYOS HAVE BEEN NEGATIVELY IMPACTED. ONE WOULD THINK THAT BY NOW WE WOULD HAVE LEARNED THAT WE DO NOT NEED - DO NOT NEED YET MORE SUCH POISONS - STILL, COMPANIES PERSIST (\$ TO CONGRESS, ETC.) TO RESIST BETTER WAYS FOR OUR ENTIRE PLANET AND PUBLIC HEALTH IN GENERAL. I DOUBT THOSE WHO PERPETRATE CONTINUING FOISTING TO MAKE PROFIT WILL FIND ETERNITY COMFORTABLE! AND INTEGRITY - EVIDENTLY THEY QUESTION WHAT IT EVEN IS!

Sincerely,

Loretta Bodiford

EXTERNAL:

Director Julie Henderson,

Dear DPR Director Julie Henderson,

It is imperative that the exact location of pesticide application in California be disclosed because it is a well know fact that proximity makes a huge difference in terms of the health effects of these chemicals. Please include this stipulation in the disclosure laws.

Sincerely,

Leaf Monroe

Scientific research confirms that the public is in greater risk of harm the closer they are to a pesticide application. An application next to one's house is of even greater concern than an application a mile away and would require more precautions.

Nearing 75% insect extinctions, all of we humans must be extremely careful in the applications of the poisons. Climate changes are only one way we humans can damage this planet beyond repair. So called pesticides and herbicides are causing biological and pathological long lasting harm to millions of species.

Thank you for reading and consideration to this message and my own personal opinion.

Sincerely,

Linda Penrose

Subject: How Can We Learn the Location of Pesticide Applications?

EXTERNAL:

Director Julie Henderson,

Dear DPR Director Julie Henderson,

Having represented farmworker clients when I was a legal aid lawyer, I know that they would wish to have advance notice of exactly where pesticides are to be applied.

So, while I certainly applaud regulations requiring provision to Californians in advance of pesticide use, your department must ensure that any new regulations actually give them effective information that will allow them to protect themselves from harm. To truly be effective, the system must include the exact location of planned pesticide applications.

Scientific research confirms that the public is in greater risk of harm the closer they are to a pesticide application. An application next to one's house is of even greater concern than an application a mile away and would require more precautions.

Sincerely,

Christopher Hamilton

I work at a school across the street from conventionally grown strawberries and there is never any kind of notice at all! We must do better.

Sincerely,
Jovita Molina
