Director Julie Henderson,

Dear DPR Director Julie Henderson,

We strongly support the effort to provide Californians with advance notice of hazardous pesticide use. We urge you to make sure the new regulation is as effective as possible to ensure that impacted residents can protect themselves from harm. To truly be effective, the system must include the exact location of planned pesticide applications.

Scientific research confirms that the public is in greater risk of harm the closer they are to a pesticide application. An application next to one's house is of even greater concern than an application a mile away and would require more precautions.

Subject: Pesticide notification must include exact location of application

EXTERNAL:

Director Julie Henderson,

Dear DPR Director Julie Henderson,

We strongly support the effort to provide Californians with advance notice of hazardous pesticide use. We urge you to make sure the new regulation is as effective as possible to ensure that impacted residents can protect themselves from harm. To truly be effective, the system must include the exact location of planned pesticide applications.

Scientific research confirms that the public is in greater risk of harm the closer they are to a pesticide application. An application next to one's house is of even greater concern than an application a mile away and would require more precautions.

Sincerely,

Kim Tran

EXTERNAL:

Director Julie Henderson,

Dear DPR Director Julie Henderson,

We strongly support the effort to provide Californians with advance notice of hazardous pesticide use. We urge you to make sure the new regulation is as effective as possible to ensure that impacted residents can protect themselves from harm. To truly be effective, the system must include the exact location of planned pesticide applications.

Scientific research confirms that the public is in greater risk of harm the closer they are to a pesticide application. An application next to one's house is of even greater concern than an application a mile away and would require more precautions.

Sincerely,

Ann Stratten

Subject: Pesticide notification must include exact location of application

EXTERNAL:

Director Julie Henderson,

Dear DPR Director Julie Henderson,

We strongly support the effort to provide Californians with advance notice of hazardous pesticide use. We urge you to make sure the new regulation is as effective as possible to ensure that impacted residents can protect themselves from harm. To truly be effective, the system must include the exact location of planned pesticide applications.

Scientific research confirms that the public is in greater risk of harm the closer they are to a pesticide application. An application next to one's house is of even greater concern than an application a mile away and would require more precautions.

Sincerely,

Linda Oeth

Sent: Wednesday, July 10, 2024 4:55 PM
To: CDPR dpr23003
Subject: Pesticide notification must include exact location of application

EXTERNAL:

Director Julie Henderson,

Dear DPR Director Julie Henderson,

We strongly support the effort to provide Californians with advance notice of hazardous pesticide use. We urge you to make sure the new regulation is as effective as possible to ensure that impacted residents can protect themselves from harm. To truly be effective, the system must include the exact location of planned pesticide applications.

Scientific research confirms that the public is in greater risk of harm the closer they are to a pesticide application. An application next to one's house is of even greater concern than an application a mile away and would require more precautions.

Sincerely,

Alexander Vollmer
