

Vanita Seth

Dear Director Henderson,

I want you to include the exact location of the application site in the upcoming statewide pesticide notification system.

I live in Santa Cruz County, where two-thirds of all pesticides by pounds are banned in the European Union. If you won't protect our communities up to world standards, the least you can do is give us a heads up as to exactly where these highly hazardous pesticides are applied, so we can try to take precautions to protect our loved ones.

Sincerely,

Vanita Seth
