Director Julie Henderson,

Dear DPR Director Julie Henderson,

We strongly support the effort to provide Californians with advance notice of hazardous pesticide use. We urge you to make sure the new regulation is as effective as possible to ensure that impacted residents can protect themselves from harm. To truly be effective, the system must include the exact location of planned pesticide applications.

Scientific research confirms that the public is in greater risk of harm the closer they are to a pesticide application. An application next to one's house is of even greater concern than an application a mile away and would require more precautions.

Subject: Pesticide notification must include exact location of application

EXTERNAL:

Director Julie Henderson,

Dear DPR Director Julie Henderson,

We strongly support the effort to provide Californians with advance notice of hazardous pesticide use. We urge you to make sure the new regulation is as effective as possible to ensure that impacted residents can protect themselves from harm. To truly be effective, the system must include the exact location of planned pesticide applications.

Scientific research confirms that the public is in greater risk of harm the closer they are to a pesticide application. An application next to one's house is of even greater concern than an application a mile away and would require more precautions.

Sincerely,

Jana Perinchief

Director Julie Henderson,

Dear DPR Director Julie Henderson,

As a young resident at the Monterey County Hospital, Natividad Medical Center, in 1980, I became involved in the treatment of farm workers poisoned by toxic pesticides.

My peers and I treated dozens of mass poisonings of farm workers in subsequent years.

For years we struggled to convince the Monterey County Board of Supervisors to pass the pesticide posting regulation which eventually was adopted state wide and has been regarded as a milestone in protecting farm workers and the public from pesticide poisoning.

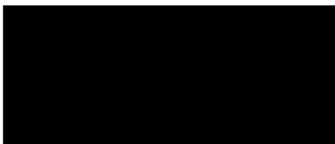

I strongly support the effort to provide Californians with advance notice of hazardous pesticide use. I urge you to make sure the new regulation is as effective as possible to ensure that impacted residents can protect themselves from harm. To truly be effective, the system must include the exact location of planned pesticide applications.
