

Mary Ann Hunter

I have lived on Cynthia Ct., in Pajaro Village for 24 years. I rode my bike to my classroom at Ann Soldo School for 11 years. I have an opening skylight which I leave open all summer. I'm outside gardening and walking all year. I'm just a few blocks from the berry fields, which are non-organic. I was diagnosed with a metastatic cancer a few months ago and am undergoing chemotherapy. I don't smoke and have tried to live a healthy lifestyle. My cat died of stomach cancer two years ago. I believe that when the surrounding fields are sprayed, they endanger our lives and the lives of our pets. I appreciate the emailed notice of spraying but that doesn't stop the effect of the wind-blown toxins entering our homes. Please have these farmers go to organic farming.
