

Tammy Qualls

PAN-1; Hi- My parents live in Grover Beach, CA near farm fields including strawberry, carrot, and other ag. crops. They use SprayDays along with their neighbors. However, the app does not give a precise enough location for them to know if they need to worry about spray drift that day. They get a lot of variable wind as they are near the ocean, so a more precise location is needed. I think within 500 feet would be sufficient.
