

Anna Maria Roy

Please do your part to try to outlaw pesticides like RoundUp. They cause cancer and are bad for the earth. Please regulate more and not less. While our state is a leader with agriculture, let us also be a leader with less toxic methods of going after pests. Killing bees and butterflies, pollinators that we need is a backwards approach. Please ban all neonicotinoids and read this article for more information: <https://www.nrdc.org/stories/neonicotinoids-101-effects-humans-and-bees>! Thank you.
