

Emma Tribble

Hello,

I'm glad to see that there is an exemption for research uses of anticoagulant rodenticides. I was also wondering if the authorization for research mentioned in the future 3 CCR 6471(d)(7) is meant to be the same kind of research authorization from 3 CCR 6260. It would be best if it was clear that the exemptions in 3 CCR 6268 still apply to anticoagulant rodenticide research and that the other requirements for research authorizations are needed in non-exempt cases.

Thank you,  
Emma Tribble
