

Reyhaneh Eghbali

Hello - I live in a wooded area with much wildlife. Are there rats? For sure - they have been in my attic, my crawlspace and they eat my fruits, but I manage them without anticoagulant rodenticides. Why? Because it is not humane. I firmly believe:

No anticoagulant rodenticides should be allowed, except during a declared public health or environmental emergency (current law),

No rollback of AB 1788, AB 2552, or AB 1322 is acceptable, and

California must invest in ecological rodent control to protect raptors and predators, not more poison
- I am doing so in my own home.

Anticoagulants are toxic and non-selective, killing the very wildlife that naturally controls rodents.

DPR is legally obligated to protect wildlife, not poison it.

Allowing >100 days of poison use ensures continued contamination of predators, pets, and ecosystems.

Californians have already demanded poison-free solutions, so DPR must honor the law.

Thank you, Rey E.
