

Elizabeth Lennie

I am horrified to hear that our state may roll back regulation of certain rat/rodent poisons that are so bad for our local wildlife and even our children...and everyone! I have been so happy to see both barn owls and great horned owls reappearing in our neighborhood in Sunnyvale, and I'm sure if these poisons are allowed these wonderful animals will disappear again. It's not only owls but many other animals will be harmed! And what about kids playing outside where this poison has been placed? It just can't be allowed!
