

Cary Sparks

I am a California resident in support of a total ban on anticoagulant rodenticides and in strong opposition to any changes to the regulations that would give exemptions for the use of rodenticides that would roll back protections gained by state legislation in 2020, 2023, and 2024.

This is a horrible way for any animal to die. And not just the rodents die - those that eat them die in the same terrible way. Owls, hawks, coyotes, foxes and bobcats are among those that eat poisoned rodents.

There are other ways to control rodents besides poisoning. Proven methods include traps and contraception.

Please consider all the animals themselves and in particular the predator species that suffer because of poisoning rodents. Thank you.
