

## Patricia Purdy

I am a California resident and I support a total ban on anticoagulant rodenticides and I am strongly opposed to any changes to the regulations that would give exemptions for the use of rodenticides that would roll back protections gained by state legislation in 2020, 2023, and 2024. These rodenticides continue to kill non-target animals. California does not need to rely on these cruel, outdated poisons. Integrated Pest Management strategies like sealing buildings, removing food and water sources, and using non-toxic controls such as contraceptives and electric traps, are humane and cost-effective solutions.
