

Trish Odenthal

Please ban the use of anticoagulant rodenticides because they are killing our owls, hawks, and other raptors. I have installed $\frac{1}{4}$ " wire cloth over openings and also a tazer trap under my house that shocks the rat entering the taser box, if they do find their way under my home. The taser shocks the rat into having a heart attack, a safe and kinder way to kill them. When rodents are in areas where they can chew on our plumbing or do other damage to our homes they can be safely eliminated without the use of rodenticides by using taser traps.

Do not allow the poison to be used 100 days a year, it will harm our already threatened owls and raptors.

Thank you for banning anticoagulant rodenticides.
