

## Susan Dentinger

No anticoagulant rodenticides should be allowed, except during a declared public health or environmental emergency (current law),

No rollback of AB 1788, AB 2552, or AB 1322 is acceptable, and

California must invest in ecological rodent control to protect raptors and predators, not more poison.

I HATE the rats that live under my back porch. But I cannot tolerate any chance of killing some other wonderful creature who eats a dead rat that has been poisoned. Fortunately there are cats around me who come and lay siege.

Anticoagulants are toxic and non-selective, killing the very wildlife that naturally controls rodents.

DPR is legally obligated to protect wildlife, not poison it.

Allowing >100 days of poison use ensures continued contamination of predators, pets, and ecosystems.

Californians have already demanded poison-free solutions, so DPR must honor the law.

Thank you for your consideration! This is very important.
