

# Inna Magner

California is leading the way in taking out of law and banning anticoagulant rodenticides from our environment, this is such an important step in protecting wildlife, birds of prey, our pets and any bypassing non target animals. The complete banning of anticoagulants and public education is essential. Keeping the laws already implementing and banning the use of such toxic chemicals should be a priority.

Rolling back this protection even for a short period of time will be devastating to our environment, to people and pets.

No anticoagulant rodenticides should be allowed, except during a declared public health or environmental emergency (current law),

No rollback of AB 1788, AB 2552, or AB 1322 is acceptable, and

California must invest in ecological rodent control to protect raptors and predators, not more poison.

Anticoagulants are toxic and non-selective, killing the very wildlife that naturally controls rodents.

DPR is legally obligated to protect wildlife, not poison it.

Allowing >100 days of poison use ensures continued contamination of predators, pets, and ecosystems.

Californians have already demanded poison-free solutions, so DPR must honor the law
