

Hilarey Benda

I am a California resident writing to express my concerns on using anticoagulant rodenticide and support a full ban on this toxic and outdated poison. There should not be any exemptions made for the expansion of use for this harmful substance. Further, it puts unintended wildlife at substantial risk of being poisoned and increases the likelihood of negative consequences to our environment.

Please oppose any changes to regulations that would give exemptions to the use of rodenticides.

Thank you for your time.
