

# Emily Renzel

Dear DPR: Please do not allow any anticoagulant rodenticides unless there is a public health emergency. Those pesticides kill the animals who naturally eat rodents - owls, foxes, cats - wild and domestic, hawks, etc. Anticoagulant pesticides are indiscriminate in their killing.

Do not rollback AB 1788, AB 2552, or AB 1322. California needs to protect natural rodent predators.

Thank you. Emily Renzel
