

## Susan Bernhard

Please do NOT allow anticoagulant rodenticides, except during a declared public health or environmental emergency (current law). Please do NOT allow rollback of AB 1788, AB 2552, or AB 1322.

California needs ecological rodent control such as raptors, owls and other predators, not more poison. Please do not poison our environment or introduce these toxins into the food chain. Protecting the earth and all species, means protection for human life too.
