

## Kitty Jones

For the wellbeing of wild animals and the ecosystems we should be protecting all anticoagulants need to be banned. All three bills (AB 1788, AB 2552, and AB 1322) are absolutely critical to protect wildlife from horrible, unnecessary, and agonizing deaths from anticoagulant rodenticides. So many animals suffer long agonizing deaths from these poisons including, peoples companion animals like cats and dog, owls, bobcats, hawks, foxes, etc! We must stop poisoning wildlife!
