

Julie Rose

- No anticoagulant rodenticides should be allowed, except during a declared public health or environmental emergency (current law),
- No rollback of AB 1788, AB 2552, or AB 1322 is acceptable, and
- California must invest in ecological rodent control to protect raptors and predators, not more poison.
 - • Anticoagulants are toxic and non-selective, killing the very wildlife that naturally controls rodents.
 - • DPR is legally obligated to protect wildlife, not poison it.
 - • Allowing >100 days of poison use ensures continued contamination of predators, pets, and ecosystems.
 - • Californians have already demanded poison-free solutions, so DPR must honor the law.
