

Carolyn Straub

No anticoagulant rodenticides should be allowed, except during a declared public health or environmental emergency (current law),

No rollback of AB 1788, AB 2552, or AB 1322 is acceptable, and

California must invest in ecological rodent control to protect raptors and predators, not more poison.

I object to this rollback. For whatever reason you have, it is the wrong thing to do, backtrack on your approved rules.

These rodenticides are also poisonous to wandering cats and dogs - your pets - and pollute the air that children and adults breathe in California.

Thank you for your interest
