

## Mary Gill

Poisons kill not only rats but many other creatures, including animals that control rats! Please protect our environment from these harmful toxins.

No anticoagulant rodenticides should be allowed, except during a declared public health or environmental emergency (current law).

No rollback of AB 1788, AB 2552, or AB 1322 is acceptable.

California must invest in ecological rodent control to protect raptors and predators, not more poison.
