

## Mike Horvath

You unelected people need to have your heads examined. The middle class is being crushed by your INSANE policies. Stop trying to drive the oil and gas industry out of California. To import gasoline and oil from other countries is idiotic. We need to use the resources that are here to drive industry and ease the burden on Californians. You are out of control and need to be throttled back. I promise you, a day of reckoning is on its way for all of you if you continue to create financial pain for the good people of California.
